

HOME BASED CRISIS INTERVENTION (HBCI) REFERRAL FORM

Home Based Crisis Intervention (HBCI) serves clients ages 5 to 18 living in Dutchess and Ulster Counties who are at risk for inpatient hospitalization due to concerns related to safety to self or other(s), or a significant decline in functioning at home, school, or in the community. If the client does not present with safety risks, include below why the family would benefit from crisis treatment services. HBCI has the best outcomes when the client and caregivers participate for 6-weeks with a minimum of two 90-minute in-home visits per week.

Please email the completed form to HBCIprogram@astorservices.org. Case consultations are available with the HBCI Program Supervisor by calling (845) 554-1365 ext. 101 or emailing HBCIprogram@astorservices.org.
