

School-based Behavioral Health and Training (SBBHT) Services

Astor Services for Children & Families promotes the well-being of children, adolescents and their families through a range of programs.

Astor Services for Children & Families has decades of experience working with special needs children in collaboration with the Department of Education in school age day treatment programs as well as clinic-based school satellite programs.

Astor is offering an array of services derived from evidence-based models, providing a comprehensive mental health partnership that is flexible and customizable to the unique needs of each school population.

Universal Interventions

Designed to impact the entire school and can include:

- Assessment
- Training/Education
- Identification and referrals

Selective Interventions

Classroom and group interventions targeting at-risk students and enhancing faculty skills and can include:

- Intensive case consultation with teachers and school support team
- PBIS/TCI Crisis Assessment
- Groups with identified students
- Specific staff training
- Teacher consultation
- Crisis avoidance, crisis response, and peer mediation

Targeted Interventions

For identified individual students and families in need and can include:

- Evidence-based treatment, assessments, and evaluations as part of on-site Article 31 satellite school-based mental health clinic
- Mental health/educational referrals and case planning

All prices are calculated based on Medicaid/commercial insurance mix of student population using a cost-share model with school district & Astor Services
